Delhi, India

ABOUT

I am a MERN stack web developer and UI designer. I love to design and build new projects with great user interfaces and experiences. Apart from these, I post some cool content related to web dev and programming on my developer Instagram handle. In the mean time, I usually write some blogs on my site on some latest stuffs. I love playing volleyball and travelling.

EXPERIENCES

> P2L Impact Learning Empowers Pvt Ltd

01/06/21 - 31/07/21 (currently working)

Translated wireframe into high quality code to build reusable profile component with great UI and also optimised the component for performance.

PROJECTS

> Amazon Clone - [Link](#)

Full e-commerce Amazon clone with stripe payment functionality with great UI having page routing.

> Weather App - [Link](#)

Decent UI designed and fully responsive weather web application with Open Weather API made in HTML, CSS and JavaScript only, also used ChartJS for chart.

> Netflix Clone - [Link](#)

Nearly cloned real Netflix to every component from login page to home page with only CSS and ReactJS.

> Covid-19 Tracker - [Link](#)

Neat, responsive, minimal and graphed covid-19 tracker which can track in any country with data fetched using covid API, made in ReactJS.

> Image Processing App - [Link](#)

Image processing app with a bunch of options to manipulate input image made in ReactJS with the help of image library.
